*\*Workshops are open to all skill levels with modified instruction*

## Mon - July 15 Half & Half Graphite Portraits

In this workshop students will learn how to add value and shading using graphite pencils. They will create portraits of themselves – half photo, half drawing. In addition to shading techniques, students will learn the skills of tracing, indenting, and measuring accurate proportions to achieve a realistic drawing.

## Tues - July 16 Block Letter Sculptures (Part 1)

Inspired by Robert Indiana's famous "LOVE" sculpture, seen by many in NYC and elsewhere, students will create their own 3D block letters. A perfect workshop for students who enjoy and/or excel at using their hands, this project has been loved by all. (Part 2 on Thurs)

## Wed - July 17 Tissue Paper Mosaics

Students will use a variety of mixed media and paper techniques to create mosaics of outdoor life. Butterflies, birds, insects flowers...the sky's the limit. Students will be provided with a variety of templates or they may design their own composition.

## Thurs - July 18 Block Letter Sculptures (Part 2)

Part 2 of this project will focus on building completion before painting and/or decorating the sculptures. Students will be provided with a variety of materials to add to their projects to make them unique and adhere to their interests.

## Friday - July 19 Linoleum Printmaking

This printmaking technique will be used to create the student's favorite cartoon, image, or a composition of their own design. Proper use of the bench hook, roller, and gouge will be demonstrated. Students will be left with a multitude of prints and a reusable rubber stamp or "plate" that they can continue to print from long after the workshop is over.
